4. Staff presented the GY2020 (March-June) Service Utilization Report. Attendees reviewed each regions' unduplicated client count and units of service by service category. Many regions had lower numbers than expected due to the COVID-19 pandemic, all regions feel that they will be or already have been increasing the number of clients accessing services. There were concerns with the number of care plans initiated/updated under the Mental Health service category and regions are going to review their data in CAREWare to ensure

- accuracy. Some regions will be initiating budget revisions as well if they determine that this will be necessary. There was a request that all regions become or continue to be proactive in seeking out clients who may need of services but have failed to reach out. Lastly there will be a data request to the Recipient's office in the OAHS and MCM service categories to confirm that the number of unduplicated clients are accurate.
5. There will be three new needs assessments conducted and these were voted on and approved. They are:
 - a. Non-Virally Suppressed needs assessment
 - b. The effects of Covid-19 on our client population
 - c. Medical Case Managers – are they receiving what they need to ensure service delivery to their clients.
 6. In it to End it, Getting to Zero: John Sapero – they are working on a regional website specific to this and will be reaching out to people to contribute their feelings regarding the experience they would like to have when visiting the website. He also shared a change in the tagline to read 'Our plan to end the HIV epidemic' due to feedback concerns. He has recruited members to a leadership team to represent communities for guidance. They have had their first meeting which was very productive. Moving forward they will establish regional leadership teams and work with priority populations.
 7. Tom Butcher, the Recipient reported on the 2 corrective action plans from Region 1 and 2. After making suggestions on their plans, the Recipient is satisfied with these and will monitor these regions moving forward.
